KUTEKS

KUTEKS

ABOUT US

Kuteks, having activities and producing all the product range in its own facilities, was established in 1983.

In its modern plant; gauze bandages, sterilized/non-sterilized gauze swabs, elastic bandages, cohesive bandages, waist care, knee care, first aids strips and plasters are being produced. Beside being the leader of the sector in domestic market; also by exporting its products to over 30 countries, commonly European, Kuteks is proud of its contribution to the national economy.

Kuteks has adopted continuous meeting of customer expectations and its legal obligations transforming quality into a living style and maintain its leading position in its sector as its principal policy. To do this, emphasis will be given to information, training, technology and the human; and development and productivity will be ensured in all departments of Kuteks A.Ş. Through participation of our personnel.

Success will belong to all of our personnel.

Cotton Gauze Bandage

Product Description

Gauze bandage is an absorbent material made from 100 % cotton yarn in compliance with EN 14079. With its hydrophilic property, highly absorbent to bleeding.

Fields of Usage

It is a woven good used for medical purposes such as fixation of dressing material on the wound. It is also used to keep a wound clean while still allowing air to ventilate the bandage and skin and help the wound to heal. The woven fabric nature of the bandage is what makes it effective in ventilating. It also makes it absorbent which is useful as it helps prevent excess moisture around the wound site.

Product Specifications

Highly absorbent.

Air-permeable.

In compliance with EN 14079.

With selvages.

Non-Sterile.

For single use.

Available as 17 thread, 20 thread, 22 thread.

Width : 2,5 cm - 20 cm

Length : Between 1 m -10 m

Self-life : 5 years

Material

100% Absorbent Cotton

Non-slipping, ergonomic, gets the shape of knee. Classical Closed Patella design ensures warmth of knee and comfortable fit. The kneecare is manufactured in 5 different sizes to fit all sizes.

Fields of Usage

It can be used as an additional support for the treatment of knee pains, knee tissues and cartilage injuries, arthritis and swelling.

Product Specifications

Elastic, skin coloured, knitted knee support.
Seamless knitting with multi-directional elastic materials ensures comfort in wearing and easy to put on/off.
Breathable, designed for all day comfort.
Special knitting structure provides easy movement.
Washable and reusable.
Fit either left or right knee.

Size	Calf Circ.	High Circ.
XS	22 cm	28 cm
S	24 cm	30 cm
M	26 cm	34 cm
L	28 cm	37 cm
XL	30 cm	39 cm

Self-life : 5 years

Material

Made of acrylic yarn, gipe polyamide and polyamide covered latex.

Ankle Support

Ankle Support

Product Description

Ankle Support provides firm compression and applies warm therapy affect with its acrylic yarn to ankle. This product is helpful for treatment of chronicle injuries. Suitable for all sporting activities.

Fields of Usage

Used for muscle and fiber injuries, arthritis, ankle injuries, joint injuries, ankle ache and throughout rehabilitation. Recommended for stiff ankles, weak ankles, or sore ankles.

Product Specifications

Open heel and toe for comfort and movement.

Pull-on type.

Easy to wear.

Washable and reusable.

Can be used in every sports activities easily.

Provides long-term usage, elasticity and comfort.

Product Dimensions

Ankle Support is manufactured in 5 different sizes to fit all sizes.

Self-life : 5 years

Material

Made of acrylic, cotton yarn and polyamide covered latex.

**2 ply
Face Mask
FMA01**

Product Description

Single use 2 ply, with ear loop face mask.

Fields of Usage

A face mask is generally worn by healthcare personnel or individual to provide protection against the spread of infectious, large-particle droplets that are transmitted by close contact and generally travel only short distances from infected patients coughing or sneezing.

Product Specifications

- Without glass fibres.
- Hypoallergenic.
- Very low resistance to breathing.
- Nose bar adaptable.
- High filtration capacity.
- Perfect fitting.

Wrist Type Blood Pressure Monitor FTA01

Product Description

Based on Oscillometric methodology and silicon integrated pressure sensor, blood pressure and pulse rate can be measured automatically and non-invasively. The LCD display will show blood pressure and pulse rate. The most recent 2*60 measurements can be stored in the memory with date and time stamp.

Fields of Usage

Fully Automatic Electronic Sphygmomanometer is for use by medical professionals or at home and is a non-invasive blood pressure measurement system intended to measure the diastolic and systolic blood pressures and pulse rate of an adult individual by using a non-invasive technique in which an inflatable cuff is wrapped around the upper arm. The cuff circumference is limited to 22cm-48cm.

Product Specifications

Blood pressure level classification indicator.

Irregular heartbeat detection.

Measuring Method: Oscillometric method, automatic air inflation and measurement.

Memory Volume: 2x60 times with time and date stamp.

Measuring Accuracy: ± 3 mmHg

Heart pulse rate range: 40-180 times/min, accuracy: $\pm 5\%$

Product Dimensions

The cuff circumference is limited to 22cm-48cm.

Material

All components belonging to the pressure measuring system, including accessories Pump, Valve, LCD, Cuff and sensor.

Arm Type - Small Blood Pressure Monitor FTA02

Product Description

Based on Oscillometric methodology and silicon integrated pressure sensor, blood pressure and pulse rate can be measured automatically and non-invasively. The LCD display will show blood pressure and pulse rate. The most recent 2x60 measurements can be stored in the memory with date and time stamp. The monitor can also show the average reading of the last three measurements.

Fields of Usage

Fully Automatic Electronic Sphygmomanometer is for use by medical professionals or at home and is a non-invasive blood pressure measurement system intended to measure the diastolic and systolic blood pressures and pulse rate of an adult individual by using a non-invasive technique in which an inflatable cuff is wrapped around the upper arm.
